Forest School
Class 6
Week 3

The sun had sadly disappeared and we welcomed the grey and the rain to the garden — hello autumn!

To start our morning we sat on the decking and recapped on our animal group names. Then we heard about this weeks challenges...

#### Task 1 - Science

• The science focus for this week was thinking about forces. We all knew that 'pushes and pulls' are forces and we thought about the activities we had done at forest school and whether they needed pushes, pulls or both to be completed. Hatty knew that using the peeler to peel the apples used a 'pull'. Fred knew that when he grated the courgettes he used 'pushes and pulls'.

Reuben knew that to make the bow saw work 'we need to use pushes and pulls'.

 We looked at some of the activities happening in the garden and decided which forces they used.

#### Task 2 – Picture Frames

• In our groups and with help from Mrs Platts and ...... we thought about how we could make a picture frame using natural materials.

• After collecting our materials in the garden, we used 'pushes and pulls' to fix our materials together in the shape we wanted to make our

frames.

### Task 3 - Cooking

• This week we thought about the forces needed to make apple and blackberry crumble...but not just any crumble as we used the blackberries we had collected from the school field in week 1!

## Task 4 – Art – Leaf Printing

• To fill our picture frames we made our own 'natural art' by printing with leaves. We thought about the kind of leaves we wanted to use to create our picture and how we would 'print'. Did we want to just use one leaf or lots of different ones? Can you see what we did?

And in the afternoon...

• When we returned after lunch we ALL went onto the decking as it was raining and listened to the story of Sir Scallywag. We then found out that we were going to make our own family of trolls from clay and natural materials. Can you see what we used to add detail? What did we call our trolls?

#### And then the weather changed...

• ...so we came inside and looked at mini-beasts. We created Top Trumps cards for our favourite mini-beast and wrote questions and interesting facts about them.

# And finally...

• ...it was time to try our apple and blackcurrant crumble! A great end to another busy Forest School day!
